Donor Account Management Wireframes

Project: Biomat USA Donor Management
Course: IS 6465 — Web Based Applications
Team: Caleb Syndergaard, Josh Stott, Cade Bray
Section author: Cade Bray (Donor Account Management)
Sources: Donor Account Management - Use Case Documentation.docx/pdf · register.php · account.php

Contents

UC-B1: Create a donor account (Create) Page 2
UC-B2: Viewing account information (Read) Page 3
UC-B3: Update Account (Update) Page 4
UC-B4: Delete Account (Hard Delete) Page 5

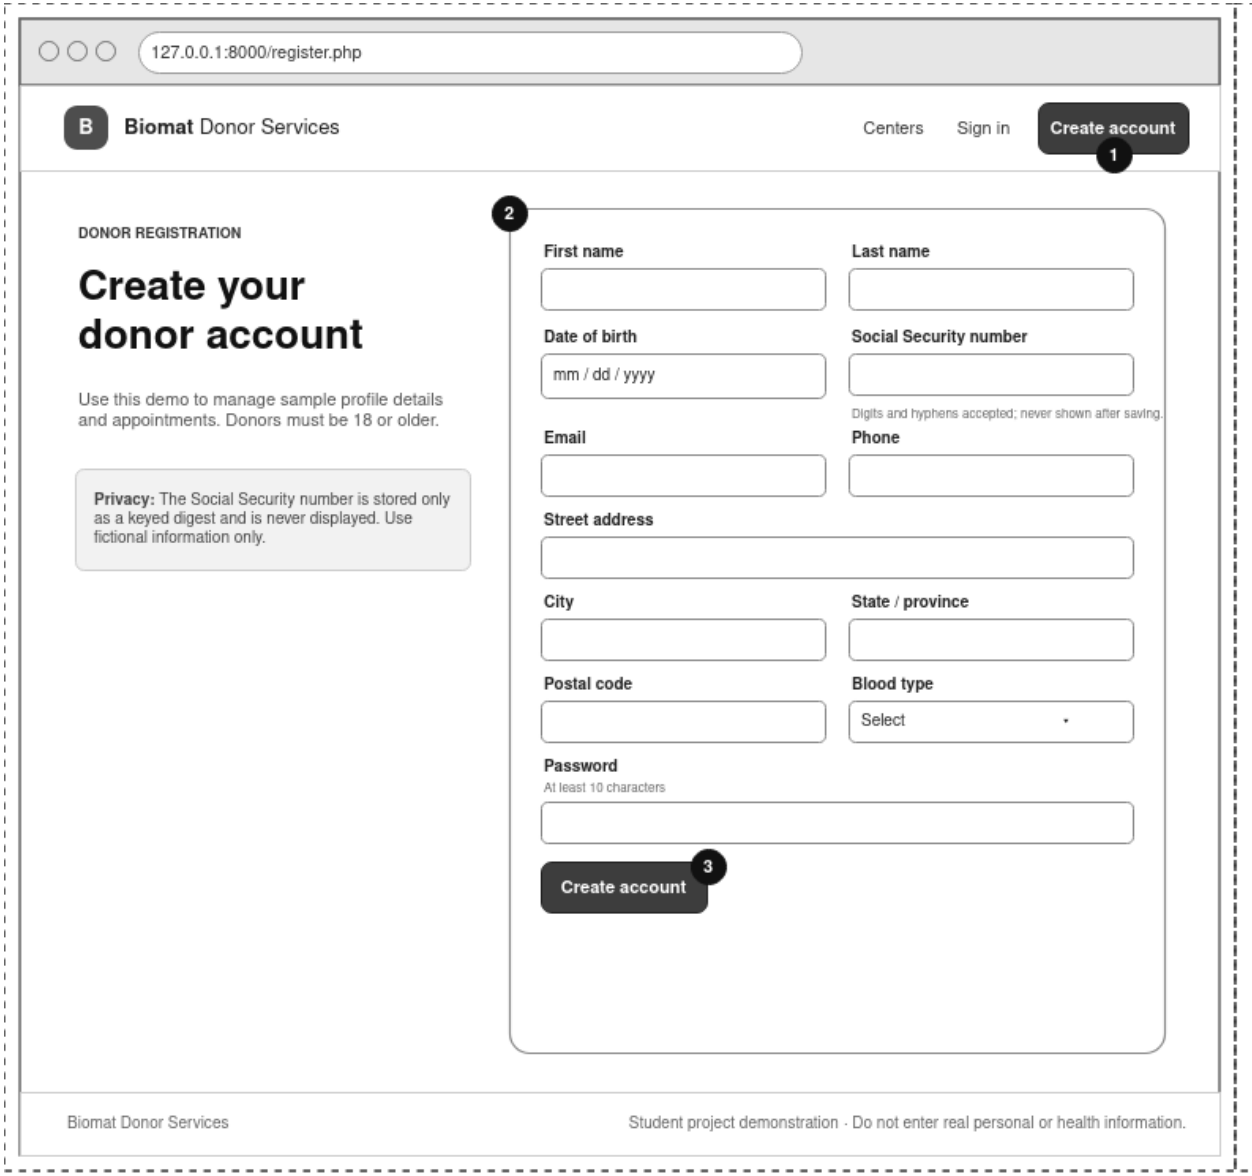

How to read these wireframes

❶	Numbered markers point to an element on the screen. The matching note in the Annotations panel explains it.
⬚	Dashed boxes are insets: another state of the same screen (an error, empty or updated state).

All four wireframes show the existing ‘My Account’ and ‘Create an Account’ pages (register.php and account.php). The register.php is the only page with its own use case UC-B1. All other wireframes, UC-B2-4, are found on the account.php page.

UC-B1: Create a donor account (Create)

Low-fidelity wireframe · Create an account page (register.php) · Primary actor: Donor

Annotations

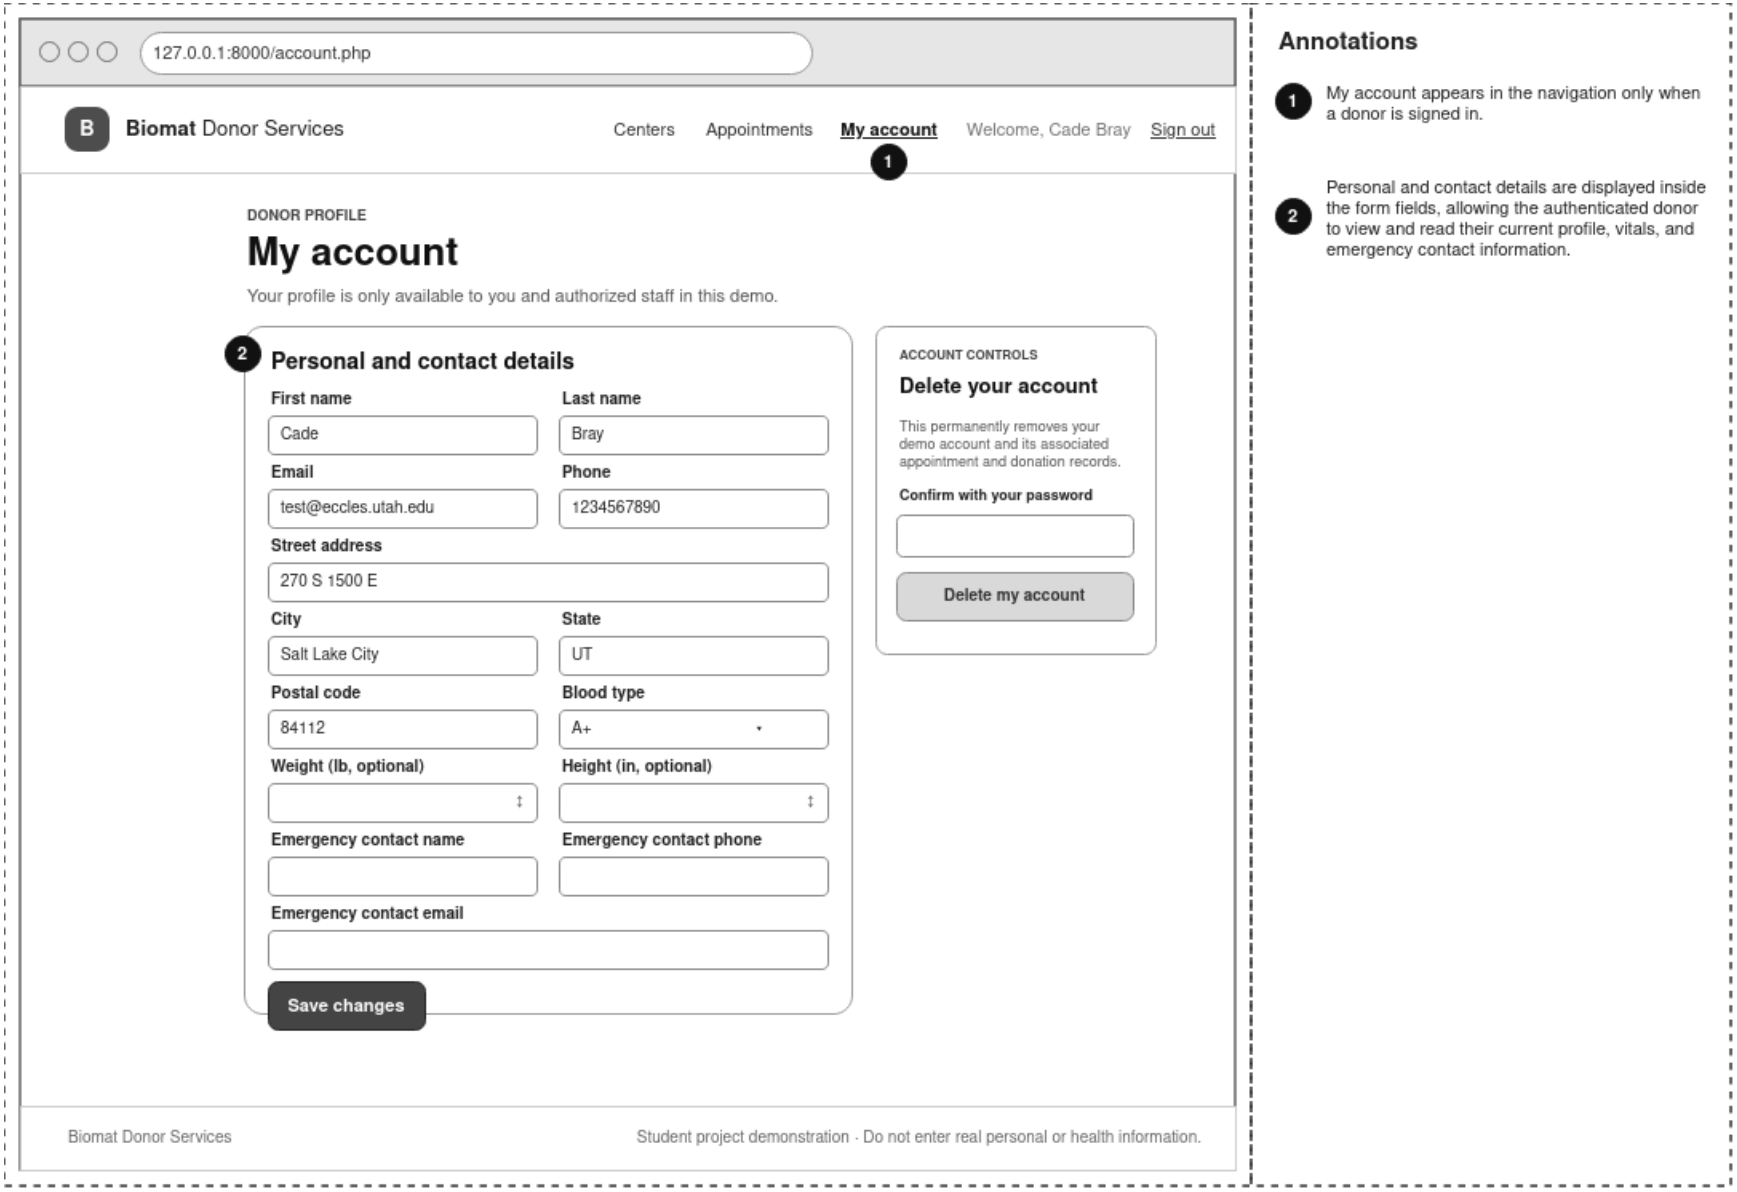

1. **Create account** appears in the navigation bar only for unauthenticated users. Authenticated users are redirected to index.php.
2. Required registration fields include Name, Date of birth (calendar selector, 18+ and not in future), SSN, Contact/Address details, Blood type, and Password (10+ characters).
3. **Create account** button submits the form. If client and server validation pass, the donor account is created.

Inset: validation errors (shown inside the form card)

- Validation errors appear at the top of the form card if required fields are missing, malformed, or if the donor is under 18 / date of birth is in the future.

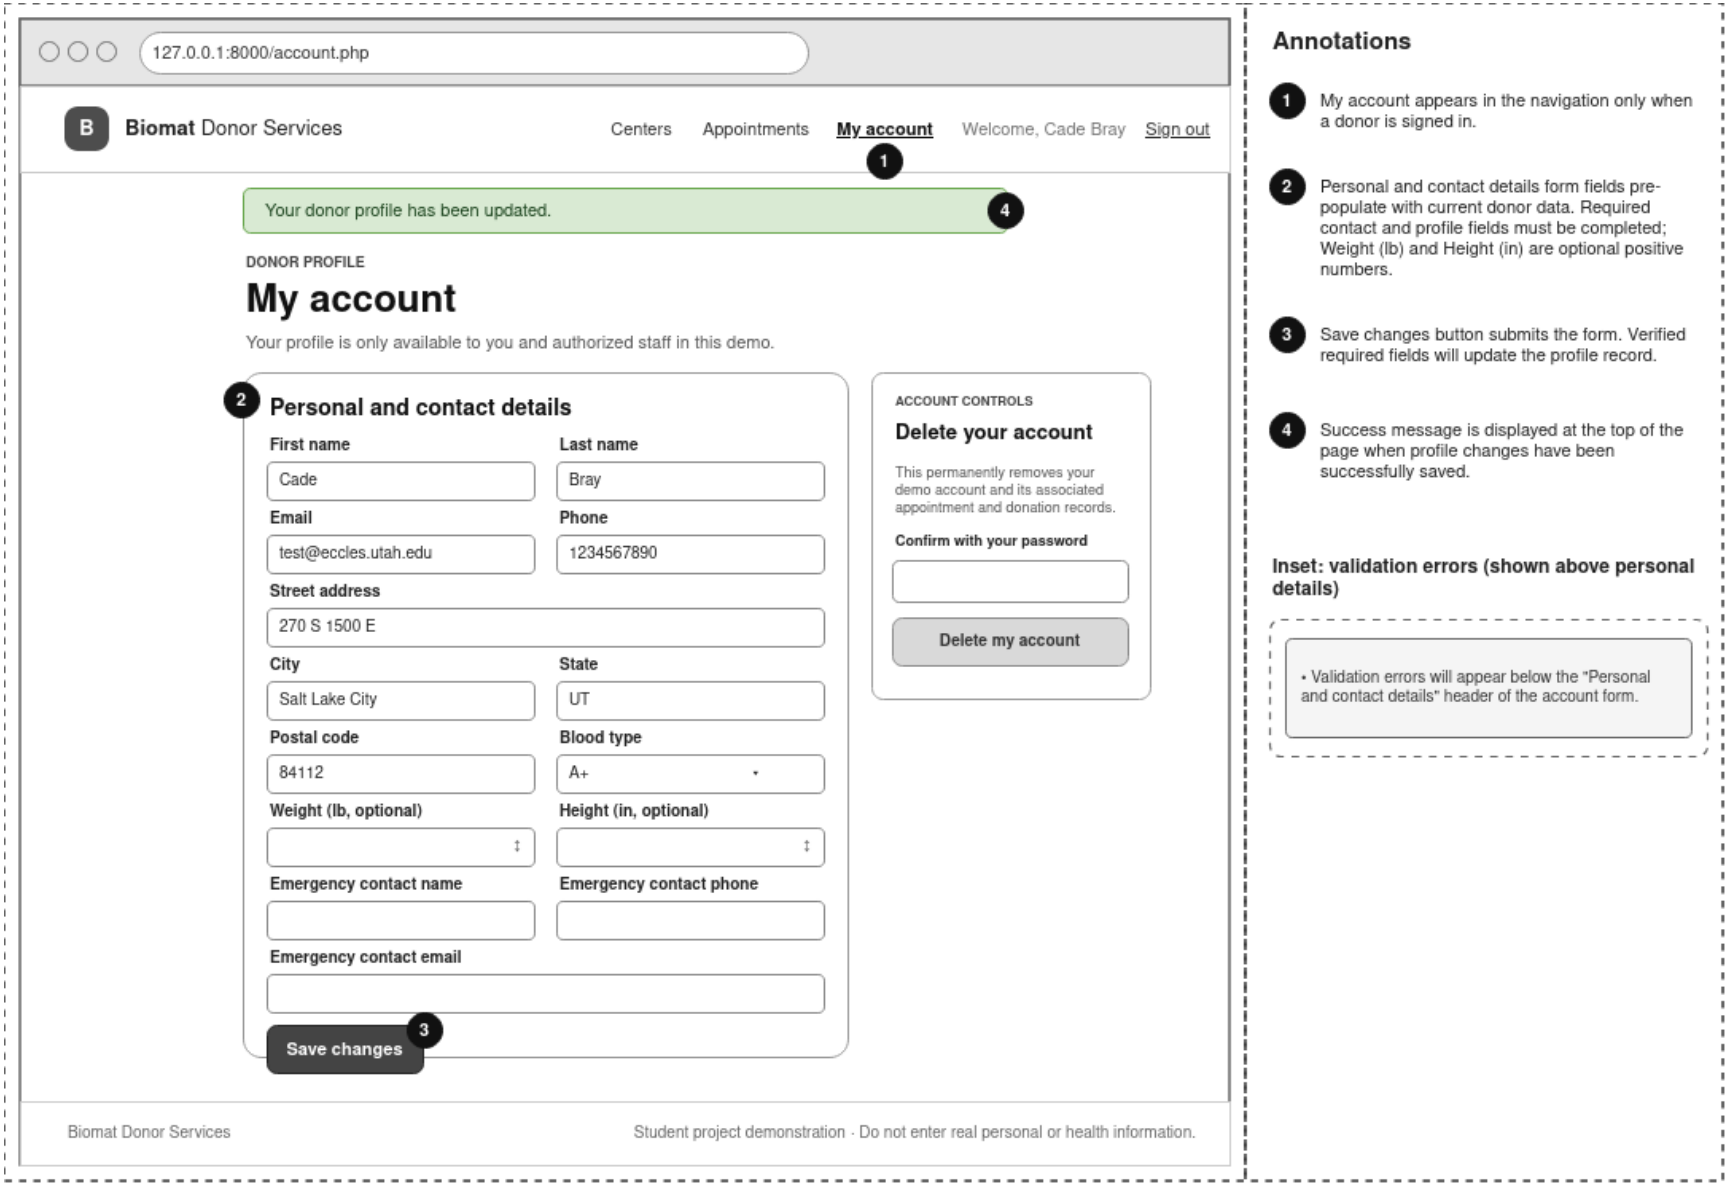

UC-B2: Viewing account information (Read)

Low-fidelity wireframe · My Account page (account.php) · Primary actor: Donor

UC-B3: Update Account (Update)

Low-fidelity wireframe · My Account page (account.php) · Primary actor: Donor

UC-B4: Delete Account (Hard Delete)

Low-fidelity wireframe · Browser confirmation on the My Account page (account.php) · Primary actor: Donor
