Appointment Management Wireframes

Project: Biomat USA Donor Management and Appointment Scheduling
Course: IS 6465 — Web Based Applications
Team: Caleb Syndergaard, Josh Stott, Cade Bray
Section author: Josh Stott (Appointment Management)
Sources: Appointment_Management_Use_Cases.docx · Appointment_Management_Activity_Diagrams.pdf · appointments.php

Contents

UC-A1: Request Appointment (Create)Page 2
UC-A2: View Appointment History (Read)Page 3
UC-A3: Update Appointment (Update)Page 4
UC-A4: Cancel Appointment (Soft Delete)Page 5

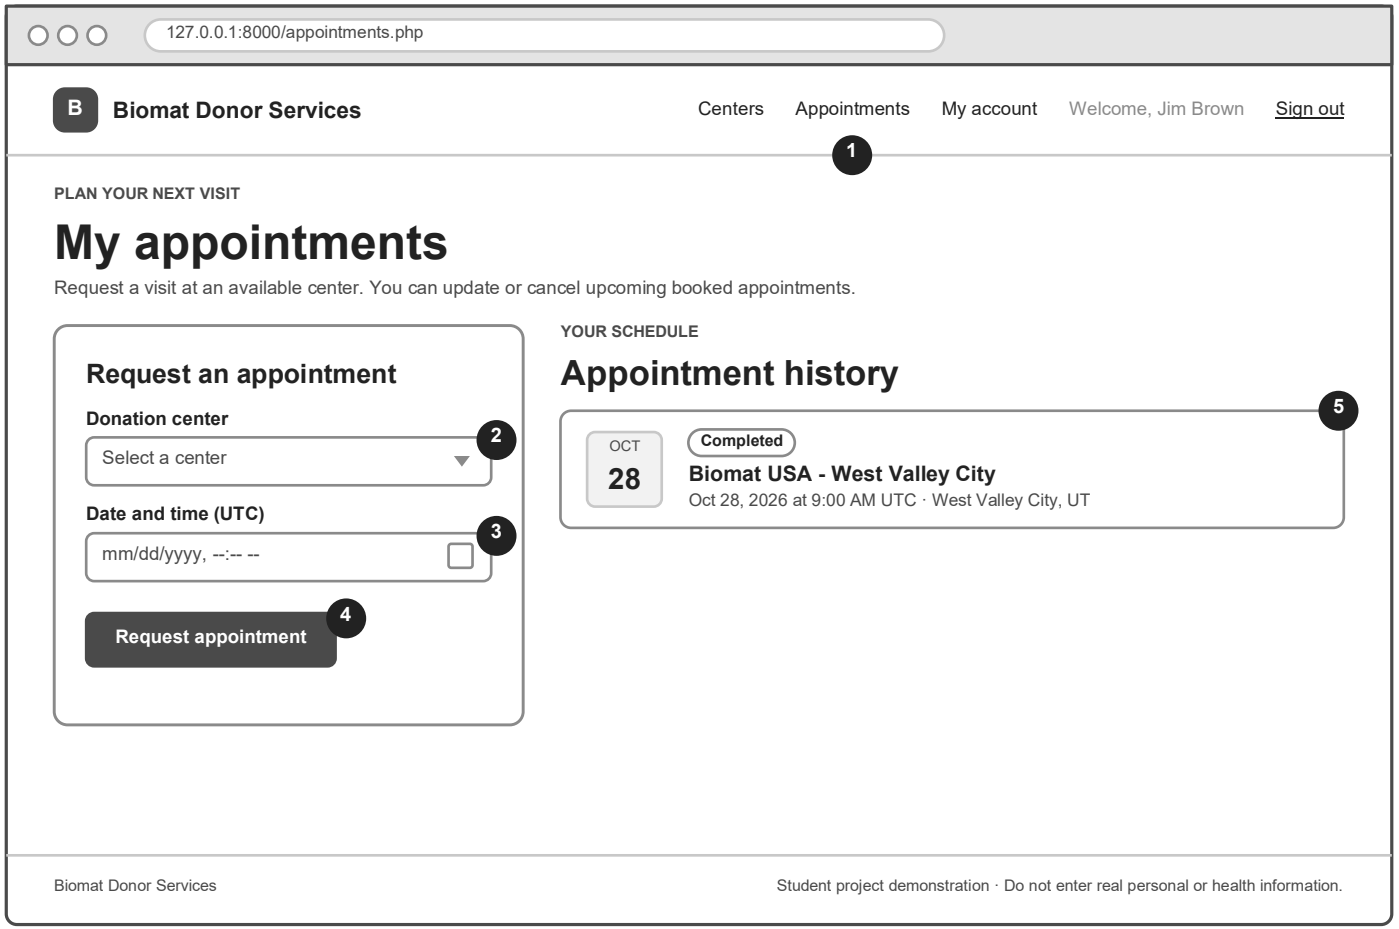

How to read these wireframes

1	Numbered markers point to an element on the screen. The matching note in the Annotations panel explains it.
⬚	Dashed boxes are insets: another state of the same screen (an error, empty or updated state).

All four wireframes show the existing My appointments page (appointments.php). The request and update forms are the same form in two modes, and cancellation uses the browser's confirmation dialog rather than a separate page. Appointment data is fictional.

UC-A1: Request Appointment (Create)

Low-fidelity wireframe · My appointments page (appointments.php) · Primary actor: Donor · Activity diagram: UC-A1

Annotations

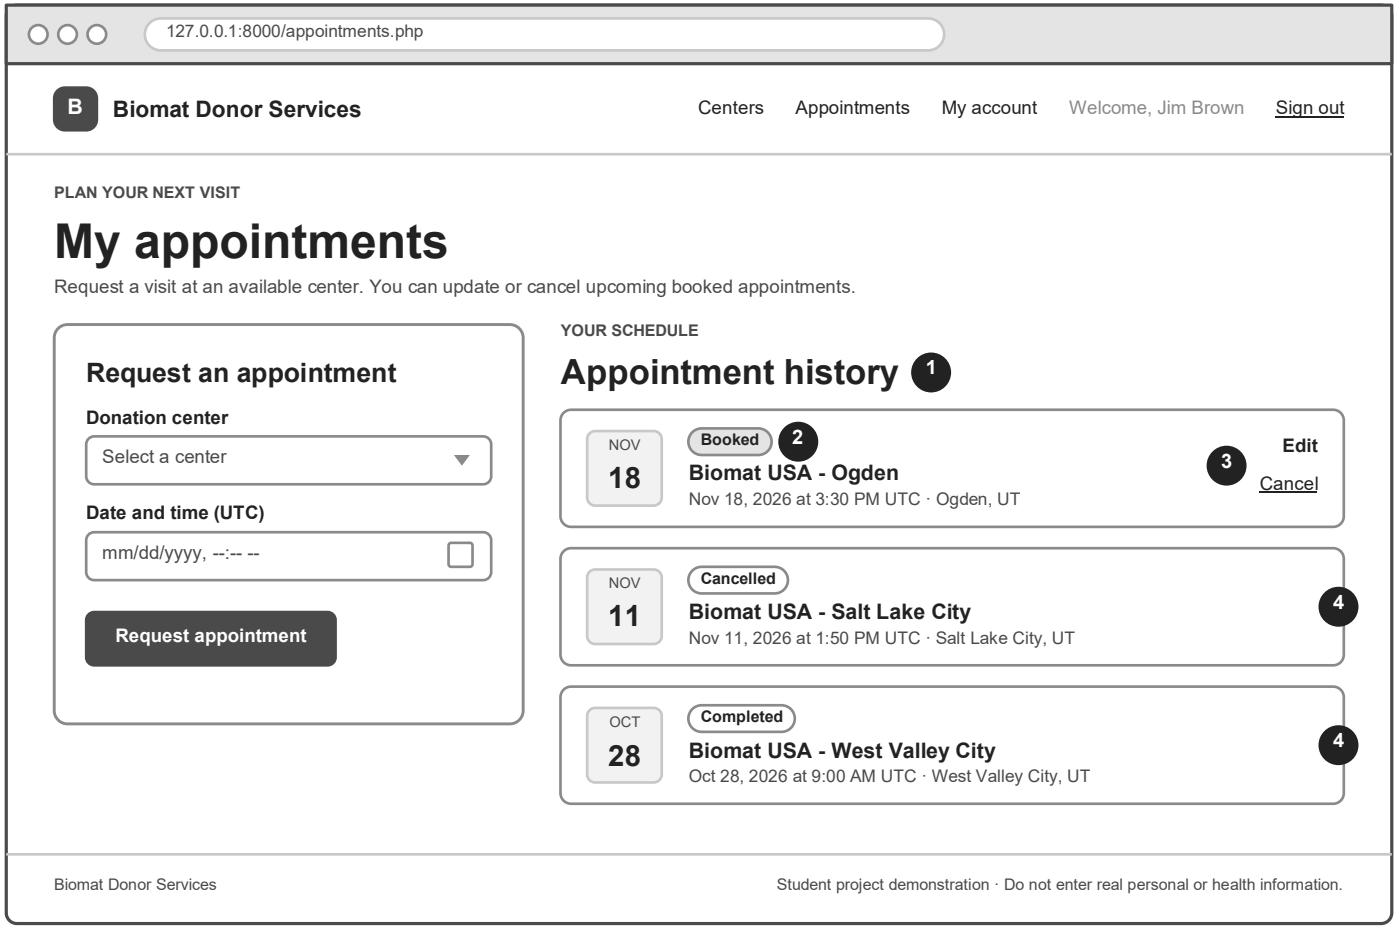

1. Appointments appears in the navigation only when a donor is signed in.
2. Donation center lists active centers only: Biomat USA - Ogden, Salt Lake City and West Valley City.
3. Date and time is entered in UTC and must be in the future.
4. Request appointment submits the form. If valid, the System saves it with status Booked and shows “Your appointment request has been saved.” at the top of the page.
5. The new appointment then appears at the top of Appointment history (most recent first). An earlier Completed visit is shown as an example.

Inset: validation errors (shown inside the form card)

- Choose a donation center.
- Choose a valid appointment date and time in the future.

UC-A2: View Appointment History (Read)

Low-fidelity wireframe · My appointments page (appointments.php) · Primary actor: Donor · Activity diagram: UC-A2

Annotations

1. Appointment history lists only the signed-in Donor's appointments, most recent first. Each record shows a date badge, status, center name, date and time (UTC), and city and state.
2. Status is Booked, Cancelled or Completed. Completed is set by personnel in the Staff workspace.
3. Edit and Cancel appear only on upcoming booked appointments (status Booked, date and time in the future). Edit opens UC-A3; Cancel starts UC-A4.
4. Past, Cancelled and Completed appointments show no actions and cannot be modified. Cancelled records stay visible in the history.
5. If the Donor has no appointments, the history shows the empty state below instead of records.

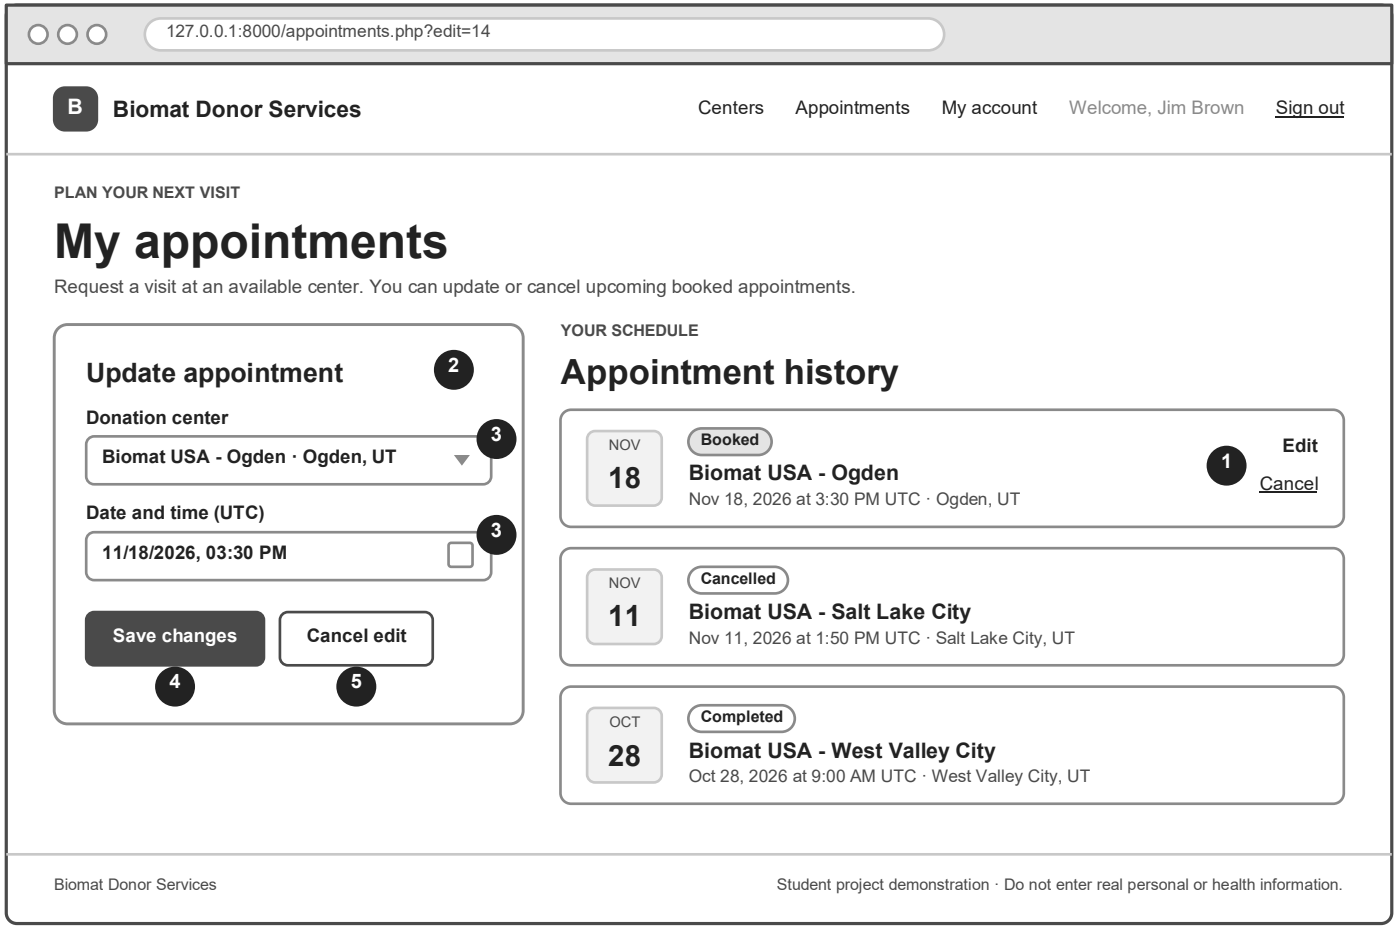

Inset: empty state

No appointments yet

Your upcoming and past appointments will appear here.

UC-A3: Update Appointment (Update)

Low-fidelity wireframe · My appointments page in edit mode (appointments.php?edit=ID) · Primary actor: Donor · Activity diagram: UC-A3

Annotations

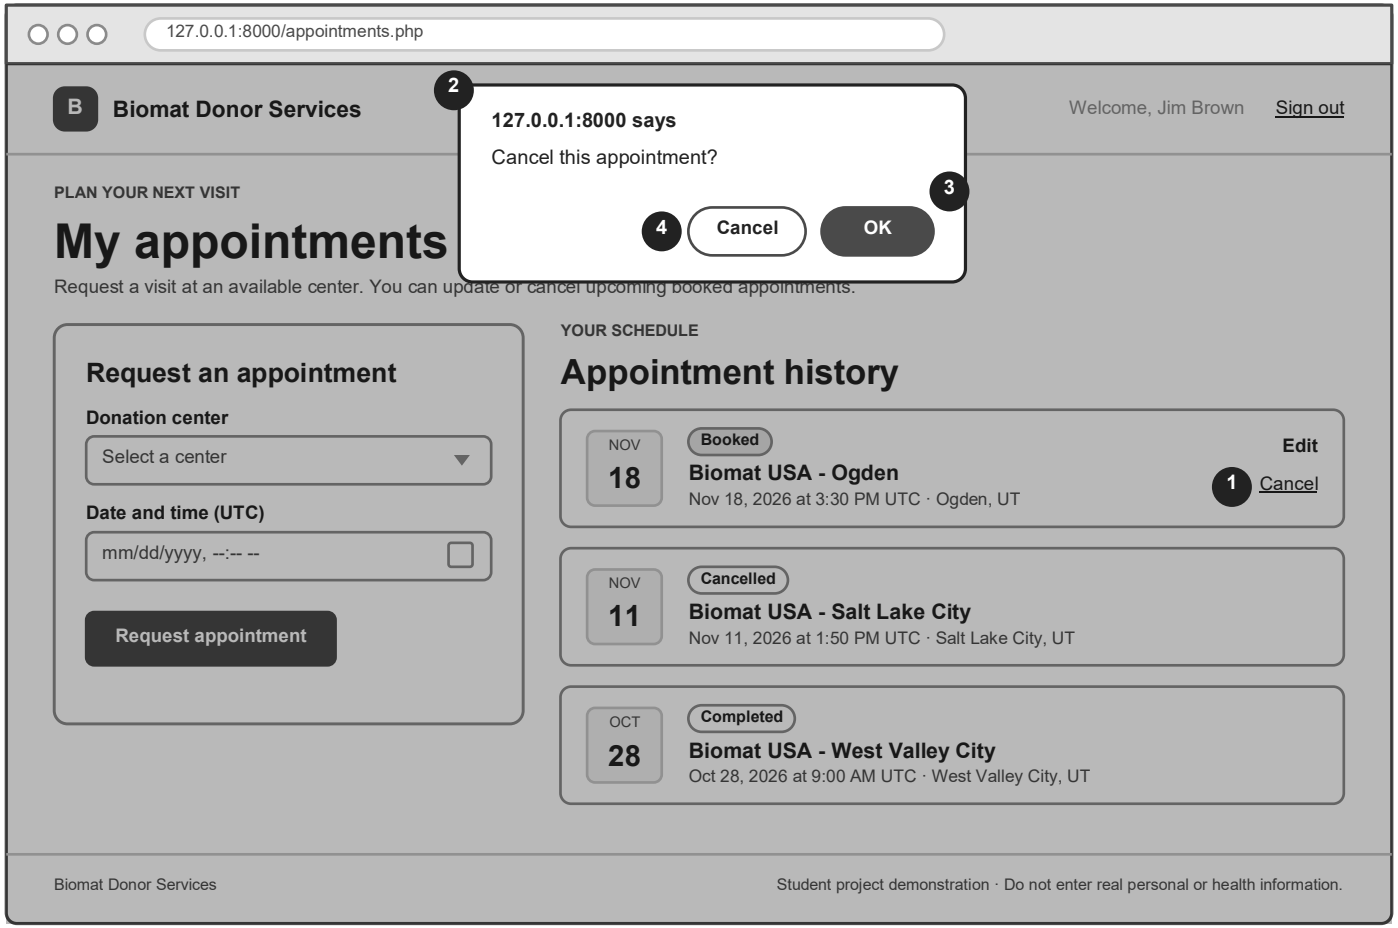

1. The Donor clicks Edit on an upcoming booked appointment. Only upcoming booked appointments that belong to the Donor can be modified.
2. The same form is reused: its title changes to Update appointment.
3. The form is pre-filled with the current donation center and date and time. Both can be changed; the same validation rules as UC-A1 apply.
4. Save changes updates the existing record (status stays Booked) and shows “Your appointment has been updated.”
5. Cancel edit discards the changes and returns to the Request an appointment form. Nothing is saved.

Inset: message if the appointment can no longer be changed

> Only your upcoming booked appointments can be changed.

UC-A4: Cancel Appointment (Soft Delete)

Low-fidelity wireframe · Browser confirmation on the My appointments page (appointments.php) · Primary actor: Donor · Activity diagram: UC-A4

Annotations

1. The Donor clicks Cancel on an upcoming booked appointment (here, Nov 18 at Biomat USA - Ogden). There is no separate cancellation page.
2. The browser shows a confirmation dialog: “Cancel this appointment?”
3. OK confirms. The System changes the status from Booked to Cancelled and shows “Your appointment has been cancelled.” The record is kept, not permanently deleted.
4. Cancel dismisses the dialog. Nothing is sent and the appointment stays Booked.

Inset: the same record after cancellation (no Edit or Cancel)
